

# ARBMiner

Innovative DeFi on Arbitrum Network  
Upto **8%** daily return and 10% referral bonus  
Fully Verified Smart Contract

**WhitePaper**  
V1.0

## What is the price of miners?

Miner do not have a set price.

Higher TVL more miners per Arb, Lower TVL less miners. This creates level playing field so no user can be late. There is NO calculator available to work this out.

## What will my daily percentage be?

Daily percentage is up to 8%

This depends on harvest habits, the time of day you compound.

or deposit and TVL fluctuation. Average daily return is 6-8%

## **What happens if i always harvest?**

If you always harvest your daily percentage will drop dramatically and will not receive the highest daily returns. This is the anti-whale mechanism that preventing a whale draining the TVL.

## **Is compounding more often better, 2 or 3 times a day?**

Yes.

## **What are 'Miners'?**

Miners are bought with Arb and work to get your mining rewards.

## Can I get my initial back?

ARBMiner is a locked rewards pool, so no. You get your initial back over time through the my rewards section of the dApp

## How come my referrals aren't showing | Where are they?

Your referrals show up in the 'My Rewards' Section of the miner dApp. Referrals are 10% of the deposit. 100 ARB deposit equals 10 ARB

## What are the fees?

There is 3% dev fee taken upon ALL deposits and withdraw from ARBMiner.

Standard Arbitrum network gas fees are required for EVERY transaction made deposits, withdraws and compound! Common issue when compounding is no gas fees!

### **Do Miners amount decrease when you harvest?**

No, the Miners amount will not change. If you make a new deposit or compound the amount will increase but not when you harvest (take rewards).

The Miners are less efficient over time if you harvest too much

### **Is this sustainable?**

Yes, as long as there is TVL in the contract then there will always be rewards. The hungry people who harvest too much get punished and get lower and lower rewards. It will last a long time the higher the TVL is

### **What is the best strategy?**

We recommend the tried and tested method as in it is written in the contract.

Compound at least one time per day for a consecutive 6 days and harvest 1 day. It will compound your investment and receive your initial back in 1-2 weeks

### **What prevents the devs from rug pull?**

The contract is immutable and fully verified. Therefore cannot be changed or altered in any way shape or form. You can view the contract on [arbiscan.io](https://arbiscan.io).

### **The 6/1 Strategy explained?**

It is 6 days not 6 compounds. In those 6 days yes you can compound as many times desired. It is just compounding faster.

### **Is it too late to invest?**

No, the contract is written to provide an optimal entry for any and all users, new or old. This is the reason the miners per ARB amount changes frequently with TVL fluctuation to provide an even playing field for any new user coming to Arbminer and not giving the first user/s a headstart

### **Can contract functions be added?**

No, the contract is immutable and cannot be changed. The contract works perfectly well as it is.

No wallets can be blacklisted, no forcing people to compound 6 days and harvest 1 day a week. Nothing can be changed

### **Does it have an anti whale mechanism?**

The contract has an in-built anti-whale mechanism.

This works as follows; User 1 compound 6:1 gets highest daily percentage in that 24 hour period. User 2 does 5:2 gets a lower percentage. User 3 does 4:3 gets lower percentage again. This happens all the way until the user who harvest continually rewards will drop to 0.5% per 24 hour period. This is to prevent 1 user draining the TVL, creating sustainability

### **What is the minimum deposit?**

1 ARB minimum deposit requirements.

If there are rewards in the "My Rewards" section and you make a new deposit both the new deposit and rewards are transferred into Miners.

### **What is minimum compound?**

Minimum compound requirement is 0.1 ARB

You will always be charged standard Arbitrum gas fees for every interaction with the contract

### **What's the roadmap long term?**

ARBMiner aims to become the largest Dapp on Arbitrum Chain. ARBMiner will have a plan for releasing token and airdrop to all early investors of ARBMiner.

### **\*\*DISCLAIMER\*\***

We DO NOT guarantee 8% a day it is up to 10%.

ARBMiner is illegal in certain countries please consider this when investing.

Do not invest more than you can afford to lose.
